WEEK 1: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Careers in Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify careers in Creative Arts and Sports.

2. Discuss various careers in Creative Arts and Sports.

3. Search the internet for information on careers in Creative Arts and Sports.

4. Appreciate the importance of careers in Creative Arts and Sports.

Key Inquiry Question(s):

- What are the career opportunities related to Creative Arts and Sports?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources (e.g., educational websites, career databases)

- Lesson notes

- Flashcards

Organisation of Learning:

Introduction (5 Minutes):

- Review content from the previous lesson, focusing on the importance of Creative Arts and Sports.

- Pose the key inquiry question to engage learners and guide them to read targeted sections in the textbook about career opportunities.

Lesson Development (30 Minutes):

Step 1: Brainstorming About Careers

- Divide learners into pairs or small groups.

- Ask them to brainstorm and discuss what a career means to them and share examples they know.

Step 2: Researching Careers

- In their groups, learners will use digital devices or print materials to search for various careers in Creative Arts and Sports.

- Encourage each group to focus on at least three different careers and take notes for presentation.

Step 3: Group Presentations

- Each group will present their findings. They should explain the careers they researched, including what these jobs entail and required skills or education.

Step 4: Creating Flashcards

- Learners will create flashcards that display the names of the careers discussed, along with a brief description or key skills required for each.

- Once completed, groups can display their flashcards in a designated area of the classroom for everyone to see.

Conclusion (5 Minutes):

- Summarize the key points discussed and review the learning objectives achieved during the lesson.

- Engage learners in a brief interactive activity, such as a quick quiz or a "thumbs up/thumbs down" discussion on various careers.

- Prepare learners for the next session by previewing upcoming topics, such as skills needed for careers in Creative Arts and Sports.

Extended Activities:

- Career Day Planning: Organize a "Creative Arts and Sports Careers Day" where guests from various fields can share their experiences.

- Career Research Project: Assign learners to choose a specific career related to Creative Arts and Sports and research it in depth, presenting their findings in a creative format (presentation, video, artwork, etc.).

- Interview a Professional: Encourage learners to reach out to professionals in their community and conduct brief interviews to learn more about their careers.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 1: LESSON 2

Strand: Foundation of Creative Arts and Sports

Sub Strand: Careers in Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the roles performed by personnel in Creative Arts Spaces.

2. Discuss the roles performed by different personnel in Creative Arts Spaces.

3. Interact with actual or virtual Creative Arts Spaces and observe the roles performed by the personnel.

4. Appreciate the roles of different personnel in Creative Arts Spaces.

Key Inquiry Question(s):

- What is a Creative Art Space?

Learning Resources:

- Lesson notes

- Digital devices

- Creative Arts and Sports Learner's Textbook

- Actual or virtual Creative Arts Spaces (e.g. online tours, videos)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a quick review of the previous lesson's main points.

- Prompt learners with the inquiry question: "What is a Creative Art Space?" Allow them to share their thoughts and definitions.

- Guide learners to read relevant content from their textbooks, focusing on the definition and characteristics of Creative Arts Spaces.

Lesson Development (30 minutes):

Step 1: Explain Creative Arts Spaces

- In small groups, learners discuss what they understand about Creative Arts Spaces.

- Assign each group to come up with a definition and three examples of Creative Arts Spaces (e.g., art galleries, theatres, recording studios).

- Groups share their definitions with the class.

Step 2: Observe personnel roles

- Introduce learners to actual or virtual Creative Arts Spaces using digital devices (e.g., virtual tours of a gallery or video interviews with personnel).

- In pairs, they observe different roles (e.g., curators, performers, technicians) as portrayed in the resources provided.

Step 3: Identify and discuss roles

- Each pair is tasked to identify and discuss at least three roles they observed and the responsibilities associated with each within the Creative Arts Space context.

- Use a chart to map out the different roles and spaces discussed by the pairs, fostering a class dialogue on how these roles contribute to the overall operation of Creative Arts Spaces.

Step 4: Reflect on appreciation

- Facilitate an open discussion where learners share their thoughts on the importance of the roles discussed.

- Guide them to appreciate how these personnel contribute to the success of Creative Arts and Sports, reinforcing the value of teamwork and collaboration in these environments.

Conclusion (5 minutes):

- Summarize the key points and learning objectives achieved during the lesson, emphasizing the diversity of roles in Creative Arts Spaces.

- Conduct a brief interactive activity (e.g., a "role match" game where learners match personnel roles with their responsibilities).

- Preview the next session’s topics, encouraging learners to think about what career in the arts or sports might interest them.

Extended Activities:

- Research Project: Assign learners to research a specific career in the Creative Arts or Sports field and create a presentation on its roles, responsibilities, and impact. They can present it in the next class.

- Virtual Guest Speaker: Arrange for a guest speaker from a local arts organization or sports team to discuss their experiences and roles, providing first-hand insight into careers in the Creative Arts and Sports.

- Creative Portfolio: Encourage learners to create a portfolio showcasing their own interests or projects related to Creative Arts and Sports, reflecting on how these roles can inspire their own work or career aspirations.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 1: LESSON 3

Strand: Foundation of Creative Arts and Sports

Sub Strand: Careers in Creative Arts

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the entrepreneurial opportunities in Creative Arts.
2. Discuss the entrepreneurial opportunities in Creative Arts.
3. Illustrate entrepreneurial opportunities in Creative Arts.
4. Acknowledge the entrepreneurial opportunities in Creative Arts.

Key Inquiry Question:

- What are the entrepreneurial opportunities in Creative Arts?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Lesson notes
- Digital resources
- Video clips

Organisation of Learning:

Introduction (5 minutes):

- Begin by reviewing key concepts from the previous lesson.

- Encourage learners to read a selected excerpt from the textbook about entrepreneurial opportunities in Creative Arts and discuss it in pairs, focusing on understanding core ideas.

Lesson Development (30 minutes):

Step 1: Introduction to Entrepreneurial Opportunities

- In pairs, students will discuss the definition of "entrepreneurial opportunities" in the context of Creative Arts and Sports.

- Prompt students to think of examples and share within the group.

Step 2: Research Activity

- Provide access to digital devices or printed resources.

- Guide learners to search for specific entrepreneurial opportunities in areas such as graphic design, music, dance, and theater.

- Encourage them to list at least three opportunities they discover.

Step 3: Video Exploration

- Show a short video clip highlighting successful entrepreneurs in the Creative Arts field.

- After viewing, facilitate a brief discussion about what students learned from the video and how these entrepreneurs found their niche.

Step 4: Illustration Activit

- In small groups, learners will create a short performance or act that illustrates one of the entrepreneurial opportunities they identified. This could be a skit, a song, or a dance.

- Optionally, groups can share their performances online with the class.

Conclusion (5 minutes):

- Summarize the key points discussed during the lesson, emphasizing the identified entrepreneurial opportunities in Creative Arts.

- Conduct a quick interactive quiz or activity where students share one entrepreneurial opportunity they learned about.

- Preview the next session's topics, inviting students to think about which entrepreneurial opportunities they might explore further.

Extended Activities:

- Research Project: Assign learners to pick one entrepreneurial opportunity in Creative Arts and create a presentation or poster that includes information about what it entails, potential challenges, and success stories.

- Guest Speaker: Invite a local artist or entrepreneur in the Creative Arts field to speak with students about their experiences and the practical aspects of pursuing a career in this area.

- Creative Journal: Encourage students to keep a journal where they document potential business ideas or personal artistic projects that could become entrepreneurial opportunities in the future.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 1: LESSON 4

Strand: Foundation of Creative Arts and Sports

Sub Strand: Careers in Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Identify entrepreneurial opportunities in sports.
2. Discuss entrepreneurial opportunities in sports.
3. Illustrate entrepreneurial opportunities in sports.
4. Acknowledge the significance of entrepreneurial opportunities in sports.

Key Inquiry Question(s):

- What are the entrepreneurial opportunities in sports?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Lesson notes
- Digital resources
- Video clips

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on the foundations of Creative Arts and Sports.

- Guide learners to read and discuss relevant content from the learning resources, focusing on the definitions and examples of entrepreneurial opportunities in sports.

Lesson Development (30 minutes):

Step 1: Research and Discussion

- In pairs, learners will use digital or print resources to identify different entrepreneurial opportunities in sports (e.g., coaching, sports marketing, fitness training, sports management, etc.).

- Prompt learners to take notes during their discussions.

Step 2: Group Sharing

- Each pair will present their findings to the class, discussing at least two entrepreneurial opportunities they discovered. Encourage questions and interactions from the audience to facilitate understanding.

Step 3: Video Analysis

- Show a brief video clip highlighting successful entrepreneurs in the sports field. After the video, have a short group discussion about what learners found interesting or surprising.

Step 4: Role-Playing Activity

- Organize a quick role-playing exercise where students can illustrate one entrepreneurial opportunity (acting as a coach, referee, or team first-aider). Each group can perform for the class to showcase their understanding of the roles and responsibilities involved in these careers.

Conclusion (5 minutes):

- Summarize the key points covered in the lesson, reinforcing the importance of recognizing entrepreneurial opportunities in sports.

- Conduct a brief interactive quiz or "think-pair-share" to reinforce the main topics discussed during the lesson.

- Provide a preview of the next session, which will dive deeper into how to start a sports-related business or career.

Extended Activities:

- Career Research Project: Have students choose an entrepreneur in the sports industry to research and prepare a presentation highlighting their career path, challenges, and successes.

- Business Plan Assignment: Ask students to develop a basic business plan for a sport-related entrepreneurial venture, including their target market, services/products offered, and marketing strategies.

- Guest Speaker: Arrange for a local sports entrepreneur to visit the classroom and share their experiences with the students, providing real-world insights into the topic.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 1: LESSON 5

Strand: Foundation of Creative Arts and Sports

Sub Strand: Careers in Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify their own talents and areas of career interest in creative arts and sports.

2. Analyze their own talents and areas of career interest in creative arts and sports.

3. Acknowledge their own and others' talents and areas of career interest in creative arts and sports.

Key Inquiry Question(s):

- What are your talents and areas of interest in creative arts and sports?

Learning Resources:

- Digital resources (videos, articles)

- Notebooks

- Creative Arts and Sports Learners Textbook

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson and its relevance to today’s topic.

- Briefly discuss examples of careers in creative arts and sports, highlighting different talents required for each career.

- Guide learners to read and discuss relevant content from their textbooks, emphasizing the understanding of key concepts associated with careers in creative arts and sports.

Lesson Development (30 minutes):

Step 1: Identification of Talents

- Activity: Have learners spend 5 minutes in silence writing down their personal talents related to creative arts and sports. Encourage them to think broadly (e.g., visual arts, music, theater, sports, coaching).

Step 2: Analyzing Interests

- In pairs, learners will discuss their lists with a partner. They should each explain why they believe these talents reflect their career interests and expectations.

- Encourage students to ask clarifying questions to help each other think deeper about their potential career paths in arts and sports.

Step 3: Journal Preparation

- Instruct learners to create a personal journal page where they summarize their talents and career interests, using bullet points or diagrams.

- Prompt them to reflect on questions: “What careers can I pursue with these talents?” and “What steps can I take to develop these talents further?”

Step 4: Sharing and Peer Assessment

- Pair students with new partners for them to share their journal entries.

- Encourage constructive feedback: what they like about their partner’s talents and potential career interests.

Conclusion (5 minutes):

- Summarize the key points discussed during the lesson, linking back to the learning objectives.

- Conduct a brief interactive activity where students shout out one talent they discovered about themselves or a peer.

- Provide a preview of the next session, which will focus on exploring specific career paths in creative arts and sports.

Extended Activities:

- Research Project: Assign students to research a specific career within the creative arts or sports industry. They will prepare a presentation on the education required, skillsets needed, and famous figures in that career.

- Talent Show: Organize a mini talent show where students can showcase their talents related to the arts or sports. This will help them acknowledge and celebrate individual talents within the class.

- Guest Speaker: Invite a professional from the local arts or sports community to speak about their career path and experiences.

Teacher Self-Evaluation:

WEEK 2: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the elements of play as a component of Creative Arts and Sports.

2. Describe the elements of a play.

3. Search for information on the elements of a play.

4. Appreciate the elements of a play.

Key Inquiry Question(s):

- What is a play?

- What are the basic elements of a play?

Learning Resources:

- Digital resources (websites, videos)

- Lesson notes

- Recorded play

- Creative Arts and Sports Learner's Textbook

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson's key points on Creative Arts.

- Guide learners to read excerpts from the Creative Arts and Sports Learner's Textbook that introduce the concept of a play.

- Facilitate a group discussion to clarify any misunderstandings of the key concepts.

Lesson Development (30 minutes):

Step 1: Brainstorming the Meaning of a Play

- In pairs, learners brainstorm and discuss what they think a play is.

- Encourage them to consider their experiences with theater, movie performances, or dramatic storytelling.

- Each pair will share their definitions with the class, promoting peer learning.

Step 2: Researching Elements of a Play

- Provide access to digital and print resources for learners to research the elements of a play (e.g., plot, characters, setting, dialogue).

- Students will work in small groups to compile their findings and prepare to share their insights with the class.

Step 3: Class Discussion on Basic Elements of a Play

- Each group presents their findings, emphasizing the basic elements of a play.

- Facilitate a discussion after each presentation to highlight differences and similarities discovered by the learners.

Step 4: Watching a Recorded Play

- Show a short recorded play performance.

- Ask students to take notes on the identified elements of the play demonstrated in the performance.

- Quick pop discussion to see if they could recognize the elements they learned about earlier.

Conclusion (5 minutes):

- Summarize the key points covered in the lesson, emphasizing the definitions and elements of a play.

- Conduct a brief interactive activity, such as a quiz or reflection in pairs, to reinforce the main topics discussed.

- Prepare learners for the next session by introducing upcoming topics, such as the role of actors in a play, and encourage them to think about their favorite performances and what makes them impactful.

Extended Activities:

1. Creative Writing:

- Have students write a short script incorporating at least three of the elements of a play they learned about. They can work individually or in small groups.

2. Play Review Assignment:

- Students could attend a local theater performance or watch a recorded play from a specific platform and write a review focusing on the identified elements.

3. Dramatic Presentation:

- Organize a mini-performance where groups create skits using the discussed elements, which will allow them to apply their knowledge creatively.

Teacher Self-Evaluation:

WEEK 2: LESSON 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1**.** Perform a short play and incorporate its basic elements.

2. Enjoy performing a short play.

Key Inquiry Question:

- What is the importance of the basic elements of a play?

Learning Resources:

- Digital resources (videos/examples of plays)

- Costumes (optional)

- Open space or classroom

Organisation of Learning:

Introduction (5 minutes):

- Begin with a quick review of the previous lesson.

- Ask students to share their thoughts on what they learned before.

- Introduce the topic of today's lesson by discussing the basic elements of a play (e.g., plot, characters, setting, dialogue).

- Engage students in a short discussion about the significance of each element.

Lesson Development (30 minutes):

Step 1: Understanding the Elements

- Divide students into small groups and provide them with digital resources to explore examples of plays.

- In their groups, students identify the basic elements (plot, characters, setting, dialogue) in the performance they watch.

- Encourage them to take notes on how these elements contribute to the play's overall effectiveness.

Step 2: Assign Roles

- Have each group create a short 2-3 minute play using the elements discussed. Assign roles such as narrator, characters, and props handler within each group.

- Provide students with creative freedom to develop their script and stage direction, emphasizing collaboration and participation.

Step 3: Rehearsal

- Allow groups to rehearse their plays, providing guidance and support as needed.

- Encourage students to incorporate costumes and props, enhancing their performance experience.

Step 4: Perform and Record

- Each group performs their short play for the class.

- Use a digital device to record each performance (if available).

- After performing, ask students to reflect briefly on how they incorporated the basic elements of a play in their performance.

Conclusion (5 minutes):

- Summarize the key points explored during the lesson, emphasizing the basic elements of a play and their importance.

- Conduct a quick interactive activity, such as a quiz or a round of questions, about the elements of a play and how they were represented in the performances.

- Briefly discuss what the students can expect in the next lesson, which may include deeper exploration of dramatic themes or character development.

Extended Activities:

- Individual Scriptwriting: Encourage students to write a short script at home based on an everyday scenario or a theme of their choice. They can either put it on paper or create a digital document.

- Character Profiles: Assign students to create detailed character profiles for the characters they played in the group performance. They should include background, motivations, and the character's role in the story.

- Analysis of a Play: Have students watch a short play (available online or in digital resources) and write a paragraph analyzing how the basic elements of the play came together to create an emotional response.

Teacher Self-Evaluation:

WEEK 2: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Define the term "Physical Fitness."

2. Discuss power and reaction time as components of physical fitness.

3. Use digital devices to search and watch clips on power and reaction physical activities.

4. Acknowledge the need for physical fitness in our bodies.

Key Inquiry Questions:

1. What is physical fitness?

2. Which activities can you perform to demonstrate power and reaction time?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Lesson notes

- Video clips (from platforms like YouTube or educational sites)

- Digital resources (e.g., educational websites)

- Pictures related to physical fitness activities

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson briefly; ask students what they remember.

- Guide learners to read and discuss relevant content from their learning resources, focusing on the definition and importance of physical fitness.

Lesson Development (30 minutes):

Step 1: Define Physical Fitness

- In pairs, learners brainstorm definitions of physical fitness.

- Each pair shares their definition with the class, and the teacher compiles these on the board to create a comprehensive definition.

Step 2: Components of Physical Fitness

- Introduce the components of physical fitness, emphasizing power and reaction time.

- Ask students to think of activities that require these components. Write their examples on the board.

Step 3: Research and Explore

- Guide students to use digital devices to search for and watch clips that demonstrate activities requiring power and reaction time, such as sprinting, jumping, and specific sports drills.

Step 4: Group Discussion

- After watching the clips, students discuss in small groups what they learned about power and reaction time, and how they relate to physical fitness. Each group will summarize their discussions to share with the class.

Conclusion (5 minutes):

- Summarize the key points covered in the lesson, emphasizing the importance of physical fitness and understanding its components.

- Conduct a brief interactive activity, such as a quick quiz or a short discussion, to reinforce main topics.

- Preview the next session that will expand on physical fitness activities and their benefits.

Extended Activities:

- Physical Fitness Journal: Students maintain a journal where they track their own physical activities for a week, noting instances of power and reaction, and reflecting on the importance of these components.

- Fitness Challenge: Organize a class challenge where students can demonstrate various physical activities related to power and reaction time, such as jumping rope or sprinting to see improvement over time.

Teacher Self-Evaluation:

WEEK 2: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Perform activities demonstrating power and reaction time as components of physical fitness.

2. Enjoy performing the activities demonstrating the components of physical fitness.

Key Inquiry Question(s):

- Why should athletes avoid performance enhancers to develop physical fitness?

Learning Resources:

- School environment

- Sport attires

- Creative Arts and Sports Learner's Textbook

- Digital resources

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson to refresh learners' memories about the components of physical fitness.

- Guide students to read and discuss relevant content from the learning resources, focusing on power and reaction time.

Lesson Development (30 minutes):

Step 1: Warm-Up Activity

- Conduct a quick warm-up to prepare the body for physical activity. Focus on dynamic stretches that engage the whole body.

- Explain the importance of warm-ups in preventing injuries and enhancing performance.

Step 2: Group Demonstration

- Divide learners into small groups and assign each group a specific exercise that enhances power (e.g., jumps, sprints) or reaction time (e.g., quick starts, agility drills).

- Each group demonstrates their exercise to the class, focusing on proper form and technique.

Step 3: Musical Movement

- Introduce an enjoyable aspect: Have learners practice their assigned exercises while music plays.

- Encourage them to move rhythmically or create a short routine incorporating their exercises, which helps blend creativity and physical fitness.

Step 4: Cool Down and Reflection

- Guide learners through a cool down to relax their muscles after physical activity.

- Lead a discussion on their experiences with the exercises, emphasizing why power and reaction time are critical components of fitness.

Conclusion (5 minutes):

- Summarize the key points learned about power and reaction time as components of fitness. Reinforce how enjoying physical activities can promote a healthy lifestyle.

- Conduct a brief interactive activity (like a quiz or a quick feedback session) to reinforce the main topics.

- Prepare learners for the next session by previewing how they will explore more about the reasons behind avoiding performance enhancers in sports.

Extended Activities:

- Fitness Journal: Encourage learners to maintain a fitness journal for a week, documenting physical activities they enjoy, their reactions to exercises, and reflections on their fitness journey.

- Group Presentation: Learners can research and present a topic about the dangers of performance enhancers in sports. They can use visual aids and present to the class to enhance their public speaking skills.

- Fitness Challenge: Organize a class competition where students perform various exercises focusing on power and reaction time. Record their performances and see improvement over a set period.

Teacher Self-Evaluation:

WEEK 2: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Define the term rhythm.

2. Explain dotted minim, dotted crotchet, quaver, and their rests as components of rhythm.

3. Carry out activities to demonstrate the dotted minim, dotted crotchet, quaver, and their rests.

4. Enjoy demonstrating the dotted minim, dotted crotchet, quaver, and their rests.

Key Inquiry Questions:

- How can you demonstrate the dotted minim, dotted crotchet, quaver, and their rests?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources and lesson notes

- Descant recorder

- Video clips

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson briefly, asking students to recall main topics discussed.

- Guide learners to read and discuss the relevant content from the learning resources, ensuring they understand the definition of rhythm and its components.

Lesson Development (30 minutes):

Step 1: Define Rhythm

- In pairs, have students brainstorm and present the definition of rhythm. Encourage them to think about how rhythm is found in different aspects of life and music.

Step 2: Explore Components of Rhythm

- Using the textbook and digital resources, students individually research and take notes on:

- Dotted minim

- Dotted crotchet

- Quaver and their corresponding rests.

- Each group then presents their findings to the class.

Step 3: Discussion

- Facilitate a class discussion on the different components of rhythm, emphasizing how each contributes to creating musical pieces.

- Encourage students to ask questions and clarify doubts.

Step 4: Demonstration

- Using body movement, instruments, and clapping exercises, guide students to demonstrate each rhythm component they've learned (dotted minim, dotted crotchet, quaver, and their rests).

- Allow groups to take turns and encourage creativity in demonstration.

Conclusion (5 minutes):

- Summarize the key points discussed in the lesson, revisiting the definitions and importance of rhythm and its components.

- Conduct a brief interactive quiz or clapping exercise to reinforce understanding of the main topics.

- Preview upcoming topics, stimulating curiosity by posing questions for consideration.

Extended Activities:

- Rhythm Composition: Ask students to create a short rhythmic sequence using dotted minim, dotted crotchet, and quaver. They can use body percussion or simple instruments.

- Group Performance: Organize small group performances where students incorporate the learned rhythms into a creative piece of music or dance.

- Rhythm Journals: Encourage learners to keep a journal where they can explore new rhythms they encounter in their daily lives, including music genres and cultural practices.

Teacher Self-Evaluation:

WEEK 3: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Define the term "note extension."

2. Discuss "dots and ties" as components of note extension.

3. Group music notes in 4/4 time incorporating note extension.

4. Acknowledge the importance of dots and ties in music as components of note extension.

Key Inquiry Question(s):

- Why is note extension important in music notation?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Lesson notes
- Charts
- Digital resources (music notation software, online tutorials)

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson about basic music notation.
- Guide learners to read and discuss relevant content from the learning resources to introduce the concepts of note extension, dots, and ties.

Lesson Development (30 minutes):

Step 1: Introduction to Note Extension

- Define "note extension." Discuss how it modifies the duration of a note.
- Encourage students to provide examples of note extension they've previously encountered.

Step 2: Exploration of Dots and Ties

- Introduce dots and ties as components of note extension.

- In groups, learners research using digital or print resources to find definitions and examples of dots (which increase the duration of a note by half) and ties (which combine two notes into one extended note).

Step 3: Practicing Notation

- Provide each group with blank staff paper.

- Learners write signs for tied and dotted notes on a staff, ensuring they understand how to properly notate these extensions.

Step 4: Grouping Notes in 4/4 Time

- Using the notes they have created, students collaborate to group music notes in 4/4 time.

- Encourage groups to discuss and present their groups of notes, emphasizing the role of note extension in creating rhythm.

Conclusion (5 minutes):

- Summarize key points: define note extension, discuss dots and ties, and their importance in music.

- Conduct a brief interactive activity: ask learners to share how note extensions can affect the feel of a piece of music.

- Preview the next session: “Exploring Rhythm and Time Signatures” and pose questions for consideration, such as “How does altering note length change the mood of a piece?”

Extended Activities:

-Composition Challenge: Students can create a short melody or rhythm piece using dotted and tied notes, then share with the class.

- Listening Assignment: Listen to a piece of music and identify where note extensions are used. Students can present their findings to the class.

- Workshops: Plan a workshop where students can work collaboratively to bring their compositions from idea to performance, focusing on the use of note extensions in their music.

Teacher Self-Evaluation:

WEEK 3: LESSON 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the pitches on the grand stave.

2. Discuss the pitches on the grand stave.

3. Draw the grand stave and name the lines and spaces.

4. Acknowledge the key pitches on the grand stave.

Key Inquiry Question:

- Which are the pitches on the grand stave?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Piano
- Lesson notes
- Digital resources

Organisation of Learning:

Introduction (5 Minutes):

- Begin the lesson by reviewing the previous topic covered in class to refresh learners' memories.
- Guide learners to read relevant sections from the Creative Arts and Sports Learner's Textbook about the grand stave, facilitating a brief discussion to emphasize and clarify understanding of key concepts.

Lesson Development (30 Minutes):

Step 1: Understanding Pitch and Grand Stave

- Activity: In pairs, learners define the terms 'pitch' and 'grand stave'.
- Discussion: Facilitate a class discussion to share definitions, ensuring clarity and understanding.
- Resource Use: Encourage students to refer to the textbook for specific definitions and examples.

Step 2: Researching Pitches on the Grand Stave

- Activity: In small groups, learners utilize digital resources to research the various pitches located on the grand stave.

- Output: Each group prepares a brief presentation on their findings, highlighting different pitches identified.

Step 3: Drawing the Grand Stave

- Activity: Learners individually draw the grand stave on paper.

- Instruction: They should carefully label the lines (E, G, B, D, F) and spaces (F, A, C, E) and correlate these with the pitches previously discussed.

Step 4: Relating to the Piano Keyboard

- Activity: Learners use a piano keyboard to identify and play the pitches they located on the grand stave.

- Demonstration: As a class, demonstrate how specific notes relate to both the grand stave and the keyboard, fostering an understanding of the connection between visual representation and sound.

Conclusion (5 Minutes):

- Summarize the key points covered in the lesson, reinforcing the learning objectives.

- Conduct a brief interactive quiz where students identify pitches on a sample grand stave provided on the board.

- Preview upcoming topics, such as the significance of musical scales, and pose questions for learners to consider for the next lesson.

Extended Activities:

- Creative Project: Learners can create a poster that visually represents the relationship between pitches on the grand stave and corresponding notes on the piano.

- Composition Task: Encourage learners to compose a short piece of music using known pitches and illustrate it on the grand stave.

- Group Performance: Assign groups to select a pitch and create a melody, which they can then present to the class using a keyboard or a digital music application.

Teacher Self-Evaluation:

WEEK 3: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Foundation of Creative Arts and Sports

Sub Strand: Components of Creative Arts and Sports

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Construct the scale of F major on a staff.

2. Play scales F major ascending and descending and their tonic arpeggios.

3. Have fun playing scales F major ascending and descending.

Key Inquiry Question(s):

- How can you construct the scale of F major on both treble and bass staff?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Music instruments (keyboard, guitars, etc.)
- Lesson notes
- Digital resources (videos, sound clips)

Organisation of Learning:

Introduction (5 minutes):

- Begin the lesson by reviewing the previous lesson's key concepts.
- Guide learners in a brief discussion of the F major scale, encouraging them to share what they remember.
- Introduce today's objectives and explain the importance of understanding the F major scale in music.

Lesson Development (30 minutes):

Step 1: Constructing the F Major Scale

- In pairs, learners will draw the treble and bass staves on their papers.
- Guide them to identify the notes of the F major scale (F, G, A, Bb, C, D, E, F).
- They will then write these notes on both staves, with and without the key signature (one flat).

Step 2: Playing the F Major Scale

- Using their music instruments, learners will practice playing the F major scale ascending and descending.
- Encourage them to focus on correct finger positioning and rhythm.
- Walk around to provide individual feedback and support.

Step 3: Tonic Arpeggios

- Introduce the tonic arpeggio of the F major scale (F, A, C).

- Have learners practice playing the tonic arpeggio along with the scale.

- Discuss how arpeggios relate to the chords in the F major context.

Step 4: Aural Recognition

- Engage learners in a sight-reading activity where they read simple melodies in C, G, and F major.

- Use digital resources for listening practice; include brief audio clips of melodies for the learners to identify the pitch.

Conclusion (5 minutes):

- Summarize the key points covered during the lesson, focusing on the construction of the F major scale and the importance of practice.

- Conduct an interactive activity, such as a quick quiz or game, to reinforce the notes of the F major scale.

- Preview the next lesson by posing questions about how different scales can affect the mood of a piece of music.

Extended Activities:

- Individual Practice: Encourage students to compose a short melody using the F major scale and share their creations with the class.

- Group Project: Organize a small performance where groups can play different scales, including F major, and present the tonic arpeggios.

- Digital Exploration: Direct students to find a famous song in F major, listen to it, and analyze its components in terms of scales and arpeggios.

Teacher Self-Evaluation:

WEEK 3: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. State the meaning of harmony/unity in a picture.

2.Discuss harmony/unity in a picture.

3. Illustrate harmony/unity in pictures and drawings.

4. Acknowledge the benefits of harmony/unity in pictures.

Key Inquiry Question:

- How is harmony/unity achieved in drawing?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Drawings and pictures

- Drawing books, Pencils, and Erasers

- Digital resources

Organisation of Learning:

Introduction (5 minutes):

- Briefly review the previous lesson's key concepts.

- Invite learners to read selected sections from the textbook that relate to harmony/unity in drawings.

- Facilitate a short discussion on learners' initial thoughts about the meaning of harmony/unity.

Lesson Development (30 minutes):

Step 1: Observation

- In pairs, learners will observe a set of pictures displayed around the classroom.

- Encourage them to focus on aspects like texture and color, noting how these elements contribute to the overall unity of the artwork.

Step 2: Research

- Students use digital or print resources to investigate the principles of unity/harmony in drawing.

- Each pair should identify key characteristics of artworks they found that exemplify unity and harmony.

Step 3: Group Discussion

- Regroup as a class for a discussion on findings from their research.

- Prompt questions such as: "What did you discover about harmony/unity?" and "Why is it important in drawings?"

Step 4: Illustration Activity

- Instruct learners to create a quick sketch that illustrates the concept of harmony/unity.

- Ask them to use elements like shape, color, and texture intentionally to demonstrate these concepts in their artwork.

Conclusion (5 minutes):

- Summarize the key points regarding harmony/unity discussed during the lesson.

- Conduct a brief interactive activity, such as asking students to share their drawings and explain how they achieved unity/harmony.

- Prepare learners for the next session by previewing topics, such as exploring emotions in art.

Extended Activities:

- Art Gallery Visit: Arrange a visit to a local art gallery where students can see real-world examples of harmony/unity in larger artworks.

- Art Reflection Journal: Have students maintain a journal where they reflect on their artwork, specifically focusing on how they achieved harmony/unity.

- Group Project: Assign groups to create a large mural that emphasizes harmony and unity; each member contributes a section representing their interpretation of these concepts.

Teacher Self-Evaluation:

WEEK 3: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub-Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1.Define the term "Painting."

2.Discuss colour harmony, colour mood, and texture of forms.

3. Illustrate colour harmony, mood, and texture of forms in painting and drawing.

4.Appreciate colour harmony, mood, and texture of forms in painting and drawing.

Key Inquiry Question:

- How does colour affect mood?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Lesson notes

- Digital resources

- Drawings and Pictures

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson on the basics of drawing. Ask students to share one thing they remember about the last topic.

- Guide learners to read and discuss relevant content from the textbook that introduces colour concepts, emphasizing how these concepts relate to emotions and visuals.

Lesson Development (30 minutes):

Step 1: Define Painting

- Ask the students what they think painting is. Write their responses on the board.

- Provide a clear definition of painting and discuss its importance in art.

- Introduce key terms: colour harmony, colour mood, and texture.

Step 2: Discuss Colour Harmony

- In pairs, have students discuss what they understand by colour harmony.

- Explain the concept and provide examples through the textbook images.

- Encourage students to think about how colours might work together in a painting to create a pleasing effect.

Step 3: Explore Colour Mood

- Lead a class discussion on how different colours can create different moods (e.g., cool colours for calmness, warm colours for energy).

- Show examples from famous paintings, asking students how they feel when looking at different colour palettes.

Step 4: Identify Texture

- Show different paintings that utilize varying textures.

- In groups, ask students to identify and describe textures they see within the images provided.

- Encourage them to consider how texture interacts with colour to enhance the overall painting.

Conclusion (5 minutes):

- Summarize the key points covered: definition of painting, understanding of colour harmony, mood, and texture.

- Ask students to share their insights from the group discussions.

- Conduct a brief interactive activity—perhaps a quiz or matching exercise—where students match colours to moods or textures.

- Prepare learners for the next session by hinting at upcoming topics, such as techniques for incorporating these elements into their own artwork.

Extended Activities:

- Art Journal: Encourage students to start an art journal where they can experiment with colour mixing and creating textures.

- Mood Board: Have students create a mood board using colour swatches cut from magazines to represent different emotions.

- Painting Project: Assign a painting project where students create their own artwork that demonstrates colour harmony, mood, and texture, which could be showcased in a class art exhibition.

Teacher Self-Evaluation:

WEEK 4: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Define the term "analogous colours" in painting.

2. Identify analogous colours in a colour wheel.

3. Classify analogous colours on a colour wheel for painting.

4. Appreciate analogous colours in painting.

Key Inquiry Questions:

- Why is colour classification important in painting?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Colour wheels

- Charts or manilla papers

- Lesson notes

- Digital resources

Organisation of Learning:

Introduction (5 minutes):

- Start the lesson with a quick recap of the previous lesson on colour theory.

- Ask students what they remember about colours and their classifications.

- Guide learners to take out the relevant sections from their learning resources and lead a brief discussion on the importance of colour in art.

Lesson Development (30 minutes):

Step 1: Definition of Analogous Colours

- Introduce the term "analogous colours" and provide a simple definition: "Colors that sit next to each other on the colour wheel and blend well together."

- Invite students to write this definition in their notes and ask them to share examples of analogous colours they can think of.

Step 2: Identifying Analogous Colours

- Provide each student or pair of students with a colour wheel.

- Instruct them to locate and identify three sets of analogous colours on their wheels.

- Facilitate a discussion about how these colours work together and where we may see them in nature or art.

Step 3: Classifying Analogous Colours through Art

- Have students use their manila papers to create a mini colour wheel, painting their identified sets of analogous colours.

- Encourage creativity and let them share their colour wheels with a partner to enhance peer learning.

Step 4: Discussion on Usage

- Conclude the lesson segment by discussing the uses of analogous colours in different art forms.

- Ask students how they might use these colours in their own artwork and gather a few examples from the class.

Conclusion (5 minutes):

- Summarize the key points discussed: definition, identification, classification, and appreciation of analogous colours.

- Conduct a brief interactive activity such as a colour matching game or a quick quiz to reinforce the concepts learned during the lesson.

- Preview the next topic: “Combinations of Colour in More Complex Art Forms” and encourage students to think about how they can apply what they’ve learned about analogous colours in their future artwork.

Extended Activities:

- Create a Nature Collage: Encourage students to gather images from magazines or online resources that showcase analogous colour schemes in nature and create a collage.

- Art Journal Reflection: Ask students to write a short reflection in their art journals about how they plan to incorporate analogous colours in their next painting.

- Visit a Local Gallery: Organize a field trip to a local art gallery to observe how professional artists use analogous colours in their works.

Teacher Self-Evaluation:

WEEK 4: LESSON 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. State the meaning of a colour gradation strip in drawing and painting.

2. Illustrate a colour gradation strip for colour harmony.

3. Enjoy painting line strips using analogous colours to study harmony.

Key Inquiry Question:

- How can you illustrate a colour gradation strip for colour harmony?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Drawing books or papers

- Pencils

- Colour materials (paints, crayons, markers)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a quick review of the previous lesson, connecting it to today's focus on colour harmony.

- Ask students to share their thoughts on how colours work together in art.

- Introduce the concept of a colour gradation strip and its importance in creating harmonious artwork.

Lesson Development (30 minutes):

Step 1: Understanding Colour Gradation

- Explain the meaning of a colour gradation strip in drawing and painting.

- Use visual examples (images from textbooks or drawings on the board) to illustrate the concepts of colour gradation and harmony.

- Engage the class in a quick discussion about how colours transition and blend.

Step 2: The Basics of Analogous Colours

- Introduce the concept of analogous colours (colours that are next to each other on the colour wheel).

- Provide examples using colour wheel visuals and ask students to identify analogous colour sets.

- Discuss how these colours can create a sense of harmony in artwork.

Step 3: Creating a Colour Gradation Strip

- In pairs, students will draw a colour gradation strip on their drawing paper using a pair of chosen analogous colours.

- Encourage them to focus on blending techniques to create a seamless transition between the colours.

- Circulate the classroom during this activity to provide guidance and encouragement.

Step 4: Reflection and Completion

- Once students complete their strips, have them display their work around the classroom.

- In groups, let each pair present their colour gradation strip and explain their choice of colours and technique.

Conclusion (5 minutes):

- Recap the main points discussed in the lesson: the definition of colour gradation, the concept of harmonious colours, and the practical activity of creating a colour gradation strip.

- Conduct a quick quiz or ask students to share what they enjoyed most about the activity to reinforce learning.

- Give students a preview of the following session – exploring more on colour theory or preparing for a group project where they will apply these concepts.

Extended Activities:

- Art History Exploration: Research and present an artist who effectively used colour harmony in their work, focusing on their technique and impact.

- Digital Art Project: Create a digital version of a colour gradation strip using graphic design software or apps, exploring modern tools for colour application.

- Nature Walk: Collect natural items (leaves, flowers) to create a colour palette. Use these colours to paint a scene inspired by their findings, promoting real-world connections to colour theory.

Teacher Self-Evaluation:

WEEK 4: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub-Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Explain the meaning of brush stroke technique in painting.
2. Paint a thin wash using the brush stroke technique to create a background.
3. Enjoy painting a thin wash using the brush stroke technique.

Key Inquiry Question(s):

- What is the brush stroke technique in painting?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Painting Surfaces
- Paints and Painting Brushes

Organisation of Learning:

Introduction (5 minutes):

- Review: Begin with a quick recap of the previous lesson, discussing what was learned about painting techniques.

- Discussion: Guide learners to read aloud relevant sections from the textbook about the brush stroke technique, highlighting its importance in painting.

Lesson Development (30 minutes):

Step 1: Introduction to Brush Stroke Technique

- Discuss what brush stroke techniques are and their various applications in painting. Ask students to share their insights or prior knowledge if applicable.

Step 2: Demonstration

- Demonstrate how to create a thin wash using the brush stroke technique. Show how to properly hold the brush, apply paint, and create a wash on paper or canvas.

Step 3: Group Practice

- In pairs, learners take turns practicing the brush stroke technique. They will work together to create a background with a thin wash, emphasizing collaboration and experimentation.

Step 4: Reflection and Sharing

- Invite learners to share their work and their experiences in trying out the brush stroke technique. Discuss what worked well and what challenges they faced.

Conclusion (5 minutes):

- Summary: Recap the key points discussed and what learners have achieved during the lesson, reinforcing the importance of brush stroke techniques in creating backgrounds.

- Interactive Activity: Conduct a quick quiz or ask students to explain the brush stroke technique in one sentence to reinforce understanding.

- Preparation for Next Session: Give a brief overview of upcoming topics related to painting techniques and encourage learners to think of different brush stroke techniques to explore.

Extended Activities:

- Art Journaling: Encourage students to maintain an art journal where they can try out different brush stroke techniques on their own. They can include observations, reflections, and plans for future projects.

- Peer Critique: Organize a session where students can exchange their art, providing constructive feedback to enhance peer learning.

- Art Show: Plan an informal art show where students can display their work, demonstrating the various brush stroke techniques they have learned. This can also promote confidence in sharing their creations with others.

Teacher Self-Evaluation:

WEEK 4: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Drawing and Painting---

Specific Learning Outcomes:

- By the end of the lesson, the learners should be able to:

1. Identify a scenery composition inspired by their surroundings.

2. Paint a scenery composition to express harmony and unity.

3. Appreciate their own and others' scenery composition paintings.

Key Inquiry Question(s):

- What should you consider before and during drawing and painting a scenery composition?

Learning Resources:

- Drawing and painting surfaces

- Sketching materials (pencils, erasers)

- Various colours and painting materials (watercolours, acrylics)

- Painting brushes

- Visual examples of landscape and seascape artwork

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on basic drawing techniques and colour theory.

- Introduce the focus of today's lesson: creating a scenery composition.

- Discuss the key inquiry question to set the stage for exploration.

Lesson Development (30 minutes):

Step 1: Observation and Research

- Learners will take a brief walk around the school grounds or look at photographs of local landscapes or seascapes.

- Encourage them to observe the elements such as colours, shapes, and textures in the scenery they choose to depict.

Step 2: Sketching the Composition

- Back in the classroom, learners will create a preliminary sketch of their scenery composition. They will focus on the arrangement of elements and how they will portray harmony and unity in their piece.

- Encourage collaboration in pairs by sharing ideas and giving constructive feedback on each other’s sketches.

Step 3: Painting the Scenery Composition

- Learners will select their preferred paints and start to fill their sketches with colour. Emphasize the importance of blending colours and creating textures that evoke feelings of harmony/unity.

- Provide guidance on basic painting techniques as they work.

Step 4: Reflection

- Allow learners a moment to reflect on their work and make any final touches.

- Ask learners to prepare to discuss their paintings and the choices they made during the process.

Conclusion (5 minutes):

- Summarize the key points of the lesson, including the importance of observation, composition, and the expression of harmony/unity in artwork.

- Conduct an interactive group discussion where students share their paintings and explain their artistic choices.

- Preview the next session, which will focus on evaluating the use of colour and composition in famous landscape and seascape artworks.

Extended Activities:

- Art Journal: Students can create a journal entry reflecting on their painting experience, discussing what worked well and what they found challenging.

- Gallery Walk: Organize a gallery walk where learners display their works and write appreciative notes to each other on sticky notes.

- Research Assignment: Assign students to research a famous landscape or seascape artist and prepare a short presentation about their style and techniques.

Teacher Self-Evaluation:

WEEK 4: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Drawing and Painting

Specific Learning Outcomes:

- By the end of the lesson, the learners should be able to:

1. Prepare working portfolios of their painted scenery compositions.

2. Appreciate their own and others' pictures.

Key Inquiry Question:

- What should you consider when preparing a working portfolio of painted scenery composition?

Learning Resources:

- Paintings and Drawings

- Digital resources (including online galleries and tutorials)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a review of the previous lesson, discussing key concepts related to drawing and painting.

- Guide learners in pairs to read and discuss relevant content from the learning resources, focusing on how to effectively prepare a working portfolio.

Lesson Development (30 minutes):

Step 1: Understanding the Portfolio

- Discuss the elements of a working portfolio (e.g., title page, artist statement, artwork descriptions).

- Show examples of effective portfolios using digital resources.

Step 2: Creating Their Own Portfolio

- In groups or individually, learners begin compiling their painted scenery compositions.

- Encourage them to include at least three pieces of their work, adding descriptions for each piece explaining their inspiration and technique.

Step 3: Collaborative Display

- Once the portfolios are completed, learners collaboratively display their portfolios in the class space or digitally on a shared platform.

- Provide guidelines on how to create engaging displays.

Step 4: Peer Assessment and Feedback

- Each student reviews another group's portfolio, providing constructive feedback using a simple rubric.

- Highlight the importance of constructive criticism and appreciation for different artistic styles.

Conclusion (5 minutes):

- Summarize the key points of the lesson, emphasizing the components of a working portfolio and peer appreciation.

- Conduct a brief interactive activity where students can share one positive aspect they noted about a peer's work and one area for growth.

- Preview the next session, hinting at exploring different painting techniques that will enhance their portfolios.

Extended Activities:

- Encourage learners to create a digital portfolio using platforms like Canva or Adobe Spark.

- Organize a mini art show where students can display their portfolios to the school community and gather feedback from a wider audience.

- Suggest students research famous artists and create a reflective piece on how their techniques can influence their own work.

Teacher Self-Evaluation:

WEEK 5: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1.Outline the effects of note extension in rhythmic patterns.

2. Describe the effect of note extension in rhythmic patterns.

3. Acknowledge the effects of note extension in rhythmic patterns.

Key Inquiry Question(s):

- What are the effects of note extension in rhythmic patterns?

Learning Resources:

- Digital resources

- Tunes involving dotted notes

- Creative Arts and Sports Learner's Textbook

- Lesson notes

Organisation of Learning:

Introduction (5 minutes):

- Review the Previous Lesson: Ask students to recall key concepts about rhythm from the last class. Engage them in a brief discussion.

- Explore Key Concepts: Allow students to read sections from the Creative Arts and Sports Learner's Textbook that relate to note extensions. Facilitate a discussion on these concepts to ensure clarity and understanding.

Lesson Development (30 minutes):

Step 1: Listening Activity

- Activity: Play excerpts of tunes that include dotted notes.

- Task: In pairs, students listen intently and identify where dotted notes occur.

- Discussion: Briefly discuss their findings as a class, focusing on where they heard the extended notes.

Step 2: Group Exploration

- Activity: Form groups of 4-5 students and assign each group a different tune that involves dotted notes.

- Task: Students will outline the effects of note extensions in their assigned tune's rhythmic pattern and how it impacts the feel of the rhythm.

- Inquiries: Encourage groups to use their digital or print resources to further explore the effects of note extensions in rhythms.

Step 3: Presentation

- Activity: Each group presents their findings to the class.

- Discussion: As they present, prompt them to explain how the note extensions change the rhythm's feel and allow for questions from peers.

Step 4: Demonstration

- Activity: Invite students to clap or tap out a basic rhythmic pattern, first without note extensions and then with extensions.

- Task: Discuss how the sound and feel differ with the applied changes in rhythm.

Conclusion (5 minutes):

- Summarize Key Points: Highlight the main effects of note extensions discussed during the lesson.

- Interactive Activity: Conduct a quick clapping exercise where students follow a specified rhythm with and without dotted notes, reinforcing their understanding of the day's lesson.

- Preview Next Session: Briefly introduce what to expect in the next lesson, such as exploring syncopation or compound time, and pose a reflective question for students to consider at home.

Extended Activities:

- Creative Composition: Have students compose a short piece of music that includes both regular notes and dotted notes. They should be prepared to explain the emotional effects of their choices in rhythm during the next class.

- Rhythm Journal: Encourage students to maintain a rhythm journal where they can illustrate rhythms they encounter in daily life or in music they enjoy, pointing out when note extensions occur.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 5: LESSON 2

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1.Describe the different note values.

2.Illustrate the different note values and their durations by clapping and using simple rhythms.

3.Enjoy practicing the different note values.

Key Inquiry Questions:

- How can you illustrate the different note values and their rests?

- How can various note combinations be used to form rhythms in simple time?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Lesson notes

- Simple rhythm examples

- Digital devices (for audio/video examples)

Organisation of Learning:

Introduction (5 minutes):

- Briefly review the key concepts from the previous lesson regarding basic musical notes.

- Guide learners to read and discuss relevant content from the textbook, focusing on note values and rests.

- Encourage students to share their thoughts on why understanding rhythm is important in music and performing arts.

Lesson Development (30 minutes):

Step 1: Introduction to Note Values

- Explain the concepts of different note values: whole note, half note, quarter note, dotted minim, dotted crotchet, and quaver.

- Show visual representations of each note value on a board or digital device.

- Discuss the duration of each note and how it translates to rhythmic value in music.

Step 2: Clapping Practice

- Have students work in pairs to practice clapping the different note values.

- Start with simple combinations and slowly introduce more complex rhythms, incorporating the dotted minim, dotted crotchet, and quaver.

- Encourage students to count out loud while clapping to internalize the rhythm.

Step 3: Collaborative Rhythm Creation

- In small groups, ask learners to create a simple rhythm sequence using the note values discussed (dotted minim, quaver, and dotted crotchet).

- Groups should practice their rhythms and prepare to perform for the class.

Step 4: Group Performances

- Provide each group an opportunity to perform their created rhythm in front of the class.

- After each performance, allow for brief feedback and reflection on how the rhythms showcase different note values.

Conclusion (5 minutes):

- Summarize the key points discussed: the importance of note values and how they form the foundation of rhythm in music.

- Conduct an interactive activity such as a quick “Rhythm Quiz” to reinforce the concepts learned (e.g., clapping back a given rhythm).

- Preview the next session’s topic, which could involve exploring more complex rhythms or introducing musical instruments to apply the concepts practically.

Extended Activities:

- Rhythm Journals: Students can keep a personal journal where they write or draw examples of different rhythms and practice clapping or tapping them at home.

- Rhythm Games: Encourage learners to create and play rhythm-based games, such as “Rhythm Bingo,” where they match rhythms to note values.

- Musical Exploration: Assign students to listen to a piece of music and identify the note values they can hear, later sharing their findings with the class.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 5: LESSON 3

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Explain the concept of a 4/4 time signature.

2. Illustrate the 4/4 time signature using various rhythmic patterns.

3. Appreciate the rhythmic patterns in 4/4 time signature.

Key Inquiry Question(s):

- How can you illustrate the 4/4 time signature using rhythmic patterns?

Learning Resources:

- Lesson notes

- Creative Arts and Sports Learner's Textbook

- Songs (preferably familiar ones that are in 4/4 time)

- Digital devices (e.g., tablets or computers for research)

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on rhythm and music basics.

- Encourage learners to read and discuss relevant content from the Creative Arts and Sports Learner's Textbook, particularly focusing on the 4/4 time signature.

- Set the tone for today’s lesson by asking students if they can name songs that they think are in 4/4 time.

Lesson Development (30 minutes):

Step 1: Explanation of 4/4 Time Signature

- Begin by explaining the concept of a 4/4 time signature (also known as "common time").

- Discuss its components: 4 beats per measure, with each beat represented by a quarter note (crotchet).

- Provide examples of songs in 4/4 time and ask learners to identify familiar tunes.

Step 2: Identifying Strong and Weak Beats

- Demonstrate how to count to four in music, emphasizing where the strong and weak beats fall.

- Use claps or a simple percussion instrument to identify the first beat as the strong beat and the third beat as an accented beat.

- Have learners practice counting and clapping the beats while listening to a song in 4/4.

Step 3: Creating Rhythmic Patterns

- Split learners into pairs or small groups.

- Each group should create a simple two-part rhythmic pattern in 4/4 time using claps, body percussion, or available instruments.

- Encourage creativity and offer suggestions to help them develop their patterns.

Step 4: Performance and Sharing

- Invite each group to perform their rhythmic pattern to the class.

- As they perform, ask the audience to identify the strong and weak beats within each group’s rhythm.

- Conclude this part of the lesson by appreciating everyone’s contributions.

Conclusion (5 minutes):

- Summarize key points about the 4/4 time signature, including its definition, counting, and rhythmic patterns created by students.

- Conduct a brief interactive activity where students take turns clapping a pattern for others to identify if it is aligned with a particular 4/4 rhythm.

- Prepare learners for the next session by previewing topics on syncopation and variations in rhythm.

Extended Activities:

- Rhythmic Composition: Assign students to create a short rhythmic composition in 4/4 using digital audio software or apps, or by writing it down on staff paper.

- Song Analysis: Encourage learners to choose a favorite song in 4/4 time and present its structure and rhythmic patterns to the class.

- Performance Project: Encourage learners to plan a short performance using instruments that demonstrate their understanding of 4/4 time; this could culminate in a 'Rhythm Day' showcase.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 5: LESSON 4

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Outline the steps to follow in composing a four-bar rhythmic pattern in 4/4 time.

2. Compose a four-bar rhythmic pattern in 4/4 time.

3. Appreciate rhythmic patterns as a means of creating interest in Creative Arts and Sports.

Key Inquiry Question:

What steps do you follow in composing a four-bar rhythmic pattern in 4/4 time?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources (e.g., instructional videos, online rhythm practice tools)

- Exercise books and instruments (if available)

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson focused on rhythmic patterns and their importance in music and movement.

- Encourage students to read and discuss relevant content from the learning resources, focusing on key concepts about 4/4 time and rhythmic composition.

Lesson Development (30 minutes):

Step 1: Introduction to 4/4 Time

- Discuss the concept of 4/4 time, emphasizing how each measure has four beats.

- Show examples of musical pieces that use 4/4 time.

- Engage students in clapping or tapping a simple beat in 4/4 time to feel the rhythm.

Step 2: Outlining the Composition Steps

- In pairs or small groups, learners outline the following steps for composing a rhythmic pattern:

1. Decide on the Pulse: Determine the tempo and how fast your rhythm will feel.

2. Choose Note Values: Select combinations of quarter notes, eighth notes, and dotted notes.

3. Draft the Pattern: Write down the chosen notes equating to four beats.

4. Add Rests: Incorporate rests to create variation and interest.

Step 3: Composing Rhythmic Patterns

- Each group collaborates to compose their own four-bar rhythmic pattern in 4/4 time, using at least one dotted note and one rest.

- They can use their exercise books to write down the rhythm, indicating note values and rests.

Step 4: Presentation of Rhythmic Patterns

- Groups take turns presenting their composed patterns to the class through clapping or playing them on available instruments.

- Classmates will listen and provide constructive feedback, discussing what they enjoyed or could improve.

Conclusion (5 minutes):

- Summarize the key points of the lesson, focusing on the steps of composing and the importance of rhythm in music and sports.

- Conduct a brief interactive activity where students create a new pattern using their favorite combination of notes and rests, then share it with a partner.

- Prepare for the next session by previewing concepts related to dynamics in rhythm and patterns, encouraging students to think about how they can make their rhythms more interesting.

Extended Activities:

- Rhythm Challenge: Assign students to create a rhythmic composition for a short dance or movement routine incorporating their rhythmic patterns.

- Group Video: Have students create a short video performing their rhythmic patterns, incorporating visuals that represent their rhythm visually.

- Rhythm Journal: Encourage students to keep a journal where they explore different rhythmic patterns they encounter in music they listen to throughout the week.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 5: LESSON 5

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Notate four-bar rhythms in 4/4 time from dictation.

2. Enjoy notating four-bar rhythms in 4/4 time from dictation.

Key Inquiry Questions:

- What factors should you consider when notating rhythms?

Learning Resources:

- Four-bar rhythms in 4/4 time.

- Digital resources.

- Creative Arts and Sports Learner's Textbook.

Organization of Learning:

Introduction (5 minutes):

- Review Previous Lesson: Briefly recap the key concepts learned in the last lesson about rhythms and note values.

- Discussion: Guide the learners to read and discuss relevant content from the textbooks, focusing on rhythm notation and key concepts.

Lesson Development (30 minutes):

Step 1: Review Note Values

- Activity: In groups or pairs, have learners review basic note values and their durations in 4/4 time.

- Discussion: Ask students to share examples of notes and how they fit into a 4/4 time signature.

Step 2: Listening Activity

- Teaching Method: Using digital resources, play one-bar and two-bar rhythms.

- Task: Learners listen carefully and notate what they hear on paper, focusing on correctly identifying and writing the rhythms.

Step 3: Dictation Exercise

- Activity: The teacher plays a simple four-bar rhythm and breaks it down bar by bar.

- Task: Learners write down the rhythmic patterns from the dictation. Encourage students to focus on accuracy.

Step 4: Peer Review

- Activity: After notating, learners share their work with their peers in pairs or small groups.

- Discussion: Encourage feedback on their notations, identifying any discrepancies and reinforcing collaborative learning.

Conclusion (5 minutes):

- Summarize: Highlight the key points learned during the lesson, including concepts of rhythm notation in 4/4 time.

- Interactive Activity: Conduct a quick quiz or a clapping exercise where students replicate rhythms you clap out.

- Preview Next Session: Prepare learners for the next lesson by introducing new themes or questions to consider based on what they learned today.

Extended Activities:

- Rhythm Composition: Assign students to create their own four-bar rhythm compositions in 4/4 time, which they will present in the next class.

- Listening Journal: Encourage students to maintain a listening journal of different pieces of music, identifying and notating rhythms they hear in 4/4 time.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 6: LESSON 1 - 2

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Explain the term sight reading in music.

2. Sight read two-bar rhythms involving dotted notes in 4/4 time using French rhythm names.

3.Enjoy sight reading different rhythms.

Key Inquiry Question(s):

- What are the benefits of sight reading in music?

Learning Resources:

- Digital resources (e.g., music apps, educational videos)

- Two-bar rhythms handouts

- Creative Arts and Sports Learner's Textbook

- French rhythm syllables reference sheet

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson focused on basic rhythmic patterns.

- Ask students to share any experiences they had with music since the last class.

- Introduce the concept of sight reading and its significance in music, using the textbook for guidance.

Lesson Development (30 minutes):

Step 1: Definition and Discussion

- In pairs, learners discuss the meaning of sight reading in music.

- Facilitate a class discussion where students share their definitions and thoughts about sight reading.

- Provide clarification and notes on the importance of sight reading for musicians.

Step 2: Clapping and Counting Short Rhythms

- Introduce clapping as a tool for understanding rhythm.

- Model how to clap and count short rhythmic phrases, focusing on dotted values.

- Allow students to practice clapping and counting these rhythms in pairs.

Step 3: Echo Clapping Exercise

- The teacher claps a two-bar rhythm pattern with dotted values.

- Students listen and echo back the rhythm using French rhythm syllables (e.g., "do," "re," "mi").

- Repeat the cycle a few times to build confidence and familiarity.

Step 4: Sight Reading Practice

- Present a new two-bar rhythm pattern with dotted notes in 4/4 time on the board.

- Have learners read the rhythm aloud using the French rhythm syllables, helping them focus on accuracy and timing.

- Invite volunteers to perform their rhythms in front of the class as a confidence-building exercise.

Conclusion (5 minutes):

- Summarize the main points: the definition of sight reading, the importance of rhythm, and the use of French syllables.

- Conduct a quick interactive activity, such as having students clap any two-bar rhythm they created themselves, either in pairs or groups.

- Preview the next lesson by introducing the topic of musical dynamics, encouraging students to think about how rhythm interacts with other elements of music.

Extended Activities:

- Students can create their own two-bar rhythm patterns using dotted notes and have a partner sight read them.

- Explore digital resources or apps designed for rhythm training and sight reading practice.

- Organize a mini-recital where students can showcase what they've learned in a supportive environment.

Teacher Self-Evaluation:

WEEK 6: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, the learners should be able to:

1. Group notes of given two-bar rhythmic patterns involving dotted notes in 4/4 time.

2. Enjoy grouping notes of given two-bar rhythmic patterns involving dotted notes in 4/4 time.

Key Inquiry Question:

- Why is grouping of rhythmic patterns important?

Learning Resources:

- Notated two-bar rhythmic patterns

- Digital resources

- Lesson notes

- Creative Arts and Sports Learner's Textbook

Organisation of Learning:

Introduction (5 minutes):

- Review the Previous Lesson: Begin with a quick recap of the last lesson about rhythm and its components.

- Discussion: Engage learners in reading and discussing relevant content from their textbooks, focusing on the importance of rhythm in music and performance.

Lesson Development (30 minutes):

Step 1: Explanation of Grouping Rhythmic Patterns

- Discuss what it means to group rhythmic patterns.

- Ask students to share their thoughts on how grouping can affect the feel and performance of music.

Step 2: Introduction to Notated Rhythmic Patterns

- Distribute notated two-bar rhythmic patterns to students.

- Briefly explain dotted notes and their significance in rhythms.

Step 3: Group Activity

- In pairs or small groups, learners will analyze the provided two-bar rhythmic patterns.

- Each group will identify and highlight the groupings within each measure, focusing on the dotted notes and their placement in 4/4 time.

Step 4: Presentation and Feedback

- Groups will present their findings on rhythmic groupings to the class.

- Provide constructive feedback and address any misconceptions. Encourage participation by allowing others to ask questions.

Conclusion (5 minutes):

- Summarize Key Points: Recap the definitions and examples of grouped rhythms covered in the lesson.

- Interactive Activity: Conduct a quick clapping exercise where students mimic different rhythmic patterns discussed, reinforcing their understanding.

- Preview Next Session: Brief the class on upcoming topics, such as the importance of tempo and dynamics in music. Encourage students to think about how rhythm plays a role in these areas.

Extended Activities:

- Rhythmic Composition Assignment: Challenge students to create their own two-bar rhythmic patterns using dotted notes. They can present their compositions in the next class.

- Group Performance: In upcoming classes, organize a performance where students interpret various grouped rhythms using percussion instruments or body percussion.

- Research Project: Assign students to research a genre of music (e.g., jazz, classical) and identify how rhythmic patterns are utilized in that genre.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 6: LESSON 4

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, students should be able to:

1. Improvise rhythmic patterns to given tunes with rhythms that involve dotted notes in 4/4 time.

2. Value each other's efforts in improvising rhythmic patterns.

Key Inquiry Question:

How can one improvise accompaniment patterns for sports?

Learning Resources:

- Digital devices

- Tunes (provided via streaming service or music player)

- Creative Arts and Sports Learner's Textbook

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on rhythms and their meanings.

- Facilitate a discussion to refresh understanding of dotted notes and 4/4 time signatures.

Lesson Development (30 minutes):

Step 1: Clapping Rhythms

- In pairs, students will practice clapping or tapping various rhythms involving dotted notes.

- Teacher will guide the students as they progress through different rhythmic patterns to ensure clarity and grasp of dotted notes.

Step 2: Listening and Identifying

- Play short musical excerpts that contain dotted rhythms in 4/4 time.

- Students will work in groups to identify where dotted notes occur in the excerpts and discuss their significance in creating rhythm.

Step 3: Improvisation

- Students will listen to simple tunes or melodies played on the digital device.

- Each student will improvise rhythms using dotted notes that complement the melodies played.

Step 4: Presentation

- Students present their improvised rhythmic patterns to the class for feedback and assessment.

- Encourage constructive criticism and peer appreciation to foster a supportive learning environment.

Conclusion (5 minutes):

- Summarize the key points and learning objectives achieved during the lesson: understanding and improvising rhythmic patterns with dotted notes.

- Conduct a brief interactive activity, such as a class clap-along, to reinforce the main topics discussed.

- Preview the next session topics or questions to consider, such as exploring how rhythm connects with movement in sports.

Extended Activities:

- Students can create a short video of themselves performing their improvised rhythmic patterns and share it with classmates.

- Encourage students to compose their own short pieces of music or rhythm patterns that could accompany a favorite sport and present it in class.

- Organize a rhythm-based sports workshop where students create rhythmic sequences that enhance team sports activities.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

WEEK 6: LESSON 5

Strand: Creating and Performing

Sub Strand: Rhythm

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Make portfolios of all rhythmic patterns explored.

2. Appreciate rhythmic patterns as a means of creating interest in Creative Arts and Sports.

Key Inquiry Question:

- Why are portfolios important?

Learning Resources:

- Created rhythmic patterns

- Digital resources (e.g., PowerPoint, art supplies for visual representation)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson on rhythmic patterns.

- Engage the class by asking them to share their favorite rhythmic pattern from the past lessons.

- Guide learners to read and discuss relevant content from digital resources, highlighting the importance of rhythmic patterns in Creative Arts and Sports.

Lesson Development (30 minutes):

Step 1: Reflection and Sharing

- In pairs, learners share the rhythmic patterns they have created or learned in previous classes.

- Encourage them to discuss why they think those patterns are interesting and unique. Facilitate a few pairs to share their discussions with the class.

Step 2: Writing and Categorizing Rhythmic Patterns

- Instruct learners to write down all the rhythmic patterns they've learned and categorize them into groups (e.g., fast, slow, complex, simple).

- Provide guidance on how to categorize effectively, and encourage creativity in their descriptions.

Step 3: Creating Digital Portfolios

- Introduce the use of PowerPoint as a tool for creating their digital portfolios.

- Instruct learners to create slides that showcase their rhythmic patterns, including visuals, sound clips, and descriptions of each pattern.

- Emphasize the importance of making their portfolios engaging and informative.

Step 4: Presenting Portfolios

- Facilitate a class presentation session where each learner (or group) presents their portfolios to the class.

- Encourage constructive feedback from peers on what they liked and what could be improved in each portfolio.

Conclusion (5 minutes):

- Summarize the key points covered in the lesson: the creation of rhythmic patterns, the significance of portfolios in learning, and the appreciation of different rhythmic styles.

- Conduct a brief interactive activity: Ask students to clap a rhythm they created and have others guess the complexity (simple or complex).

- Inform learners about the next session's focus on the application of rhythm in performance arts and sports. Encourage them to think about which rhythms they find most inspiring and why.

Extended Activities:

- Rhythm Challenge: Ask students to create a short dance or movement sequence using their rhythmic patterns. They can perform it in front of the class.

- Rhythmic Art: Have students design a piece of visual art inspired by the rhythms they have learned, focusing on how shapes and colors can represent different rhythmic feelings.

- Rhythm Journals: Encourage students to keep a journal of new rhythmic patterns they encounter in their daily lives, including music, sports, and cultural events.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 7: LESSON 1

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the phases in Triple Jump.
2. Describe the phases in the Triple Jump.
3. Search the internet for clips illustrating the phases in Triple Jump.
4. Acknowledge the phases involved in Triple Jump.

Key Inquiry Question(s):

- What phases are involved in the Triple Jump?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Video clips
- Digital devices (tablets/laptops)
- Pictures (illustrative materials)
- Lesson notes

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson on general jumping techniques.

- Encourage students to share what they remember about jumping events and connect them to the new topic.

- Guide learners to read and discuss relevant content from the learning resources, focusing on the key concepts of the Triple Jump.

Lesson Development (30 minutes):

Step 1: Introduction to Triple Jump

- In pairs, students brainstorm what they believe is involved in the Triple Jump and write their ideas on the board.

- Discuss the meaning of Triple Jump and its significance in athletics.

Step 2: Research Phase

- Using digital devices, learners search for video clips that illustrate the Triple Jump.

- Each group selects a clip to watch and prepares to identify the specific phases depicted in it.

Step 3: Phases Identification

- While watching the clip, students highlight the different phases of the jump: the 'hop,' 'step,' and 'jump.'

- After viewing, they list out these phases and share their observations with the class.

Step 4: Group Discussion

- Initiate a discussion where learners explain the phases they observed in their clips.

- Facilitate a conversation about how each phase contributes to the overall performance of a Triple Jump.

Conclusion (5 minutes):

- Summarize the key points discussed about the phases of Triple Jump: hop, step, and jump.

- Conduct a quick interactive activity, such as a Q&A, where students can raise their hands to answer questions on each phase.

- Provide a brief preview of what will be covered in the next lesson, focusing on the techniques for improving performance in Triple Jump.

Extended Activities:

- Ask students to create a short video or poster presentation explaining the techniques for each phase of the Triple Jump and share it with the class.

- Organize a practical session where students can attempt the Triple Jump and receive feedback on their performance.

- Encourage students to research famous Triple Jump athletes and present one athlete's technique and achievements to the class in the next session.

Teacher Self-Evaluation:

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL

	GRADE 9	**CREATIVE ARTS**			

WEEK 7: LESSON 2 - 3

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, students should be able to:

1. Perform the Triple Jump for skill acquisition.

2.Acknowledge their own and others' efforts in performing the Triple Jump.

Key Inquiry Questions:

- Why is it important to follow the phases of jumping in the Triple Jump?

- What are the rules of Triple Jump?

Learning Resources:

- School Environment

- Triple Jump Field

- Digital Devices (for recording performances)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson on jumping techniques.

- Guide students in discussing the key concepts of Triple Jump, pulling content from their digital devices and the school environment.

Lesson Development (30 minutes):

Step 1: Introduction to the Rules of Triple Jump

- Divide the class into small groups or pairs.

- Each group researches and outlines the basic rules of Triple Jump using digital devices.

- Groups share their findings, ensuring everyone understands the standing rules for the event.

Step 2: Demonstration of the Phases of Triple Jump

- Teacher demonstrates the essential phases: approach, take-off, flight, and landing.

- Students take turns practicing each phase with support from peers, who can give tips based on the rules discussed earlier.

Step 3: Skills Practice

- Students practice the whole Triple Jump sequence: approach, take-off, flight, and landing.

- Encourage students to record their practice using digital devices to self-evaluate their technique later.

Step 4: Observation and Feedback

- In pairs, students watch each other’s recorded jumps and provide positive feedback.

- Conduct a brief discussion about the importance of constructive criticism and acknowledging efforts.

Conclusion (5 minutes):

- Summarize the key points and learning objectives achieved during the lesson, focusing on the importance of each phase in the Triple Jump.

- Engage students in a quick interactive activity where they shout out one key rule they learned about Triple Jump.

- Prepare students for the next session by sharing that they'll delve into how to improve their personal best.

Extended Activities:

- Have students research famous Triple Jump athletes and their techniques. Each student can present their findings in the next class.

- Set up an outdoor mini Olympics event where students can compete in various jump forms, practicing sportsmanship and team collaboration.

Teacher Self-Evaluation:

WEEK 7: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify long distance races in athletics.

2. Discuss the different long distance races in athletics.

3. Use digital devices to search for and watch clips on different long distance races in athletics.

4. Acknowledge the significance of the various long distance races in athletics.

Key Inquiry Question:

- Which long distance races in athletics do you know?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Lesson notes

- Digital resources

- Video clips

Organisation of Learning:

Introduction (5 minutes):

- Briefly review key points from the previous lesson, focusing on the overall theme of athletics.

- Introduce today's topic by asking students for their prior knowledge of long distance races and guiding them to read relevant sections from the learner’s textbook.

Lesson Development (30 minutes):

Step 1: Understanding Long Distance Races

- In pairs, learners discuss what constitutes a long distance race.

- Teacher facilitates a brief group discussion, collecting responses and clarifying misconceptions.

Step 2: Identifying Long Distance Races

- Individually, learners list various long distance races they know (e.g., marathon, half marathon, 10,000 meters).

- Students then share their lists with the class, allowing for the opportunity to introduce any new races they may not be aware of.

Step 3: Digital Exploration

- Guide learners to use digital devices to search for video clips showcasing some of the identified long distance races.

- Provide links or QR codes to specific clips for easier access.

Step 4: Group Discussion

- After viewing, learners regroup to discuss what they observed in the clips. Pose questions such as: What strategies do runners use in these races? What are the unique features of each race?

Conclusion (5 minutes):

- Summarize key points and learning objectives achieved during the lesson.

- Conduct an interactive activity, such as a quick quiz or game based on what was learned.

- Prepare learners for the next session by introducing a preview of upcoming topics related to athletics.

Extended Activities:

- Research Assignment: Students could research a specific long distance race, its history, rules, and notable athletes, and prepare a short presentation to share with the class.

- Create a Race Diary: Have learners maintain a diary of their weekly training sessions if they participate in long distance running, encouraging them to reflect on their progress.

Teacher Self-Evaluation:

WEEK 7: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Identify the techniques for long-distance running.

2.Discuss the techniques for long-distance running.

3. Perform techniques for long-distance running.

4. Acknowledge the techniques used in long-distance running.

Key Inquiry Question(s):

- What are the techniques used in long-distance running?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources (videos, articles)

- Resource person (athletics coach or experienced runner)

- School field

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on the importance of physical fitness and basic running techniques.

- Guide learners to read a selected passage from the textbook on long-distance running and encourage a brief discussion about their prior knowledge or experiences with running.

Lesson Development (30 minutes):

Step 1: Introduction to Techniques

- Present a brief overview of various long-distance running techniques using a video or visual aids. Emphasize elements like posture, breathing, and pacing.

Step 2: Group Activity – Interview or Research

- Divide the class into small groups. Each group will either:

- Interview a resource person (e.g., athletics coach) about essential techniques for long-distance running.

- Watch instructional clips on running techniques and take notes.

Step 3: Discussion

- Each group discusses their findings on the techniques learned. The teacher circulates to provide guidance and encourage critical thinking.

Step 4: Practical Application

- Move to the school field where learners will practice the identified techniques in a safe environment, focusing on form and executing proper technique.

Conclusion (5 minutes):

- Summarize the key points discussed during the lesson: the importance of technique in long-distance running.

- Conduct an interactive quiz or Q&A session where learners can share their favorite techniques learned.

- Brief the learners on upcoming topics, such as endurance training and nutrition for athletes, and pose questions to consider at home.

Extended Activities:

- Long-Distance Running Diary: Encourage learners to keep a running diary for a week, documenting their runs, techniques practiced, and any improvements noted.

- Guest Speaker Session: Schedule a session with a local long-distance runner to discuss their training regimen and techniques in depth.

- Technique Video Project: Assign learners to create a short video demonstrating and explaining proper long-distance running techniques, which could be shared with peers or in a school event.

Teacher Self-Evaluation:

WEEK 9: LESSON 1 - 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Perform the different long-distance races in athletics.

2.Acknowledge their own and others' efforts in performing long-distance skills.

Key Inquiry Question(s):

- How has long-distance running benefitted Kenya?

Learning Resources:

- School Field

- Digital resources (videos, articles on long-distance running)

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson briefly and ensure that students recall key concepts.

- Guide learners to read an excerpt from a digital resource discussing the impact of long-distance running in Kenya, illustrating cultural and economic benefits.

- Facilitate a discussion on students' thoughts regarding the key inquiry question.

Lesson Development (30 minutes):

Step 1: Warm-Up and Technique Review

- Conduct a warm-up session that focuses on stretching and muscle activation.

- Review key techniques for long-distance running, including posture, breathing, and pacing.

Step 2: Practice the Races

- Divide students into groups and assign each group a different distance (3000m, 5000m, 10,000m, and half marathon).

- Allow each group to practice their assigned distance while focusing on maintaining correct running techniques.

Step 3: Peer Observation and Feedback

- After practice, have students observe one another's performances.

- Encourage them to provide constructive feedback on techniques used, effort levels, and improvement suggestions.

Step 4: Reflection on Performance

- As a class, reflect on everyone's experiences during practice.

- Discuss how their observations and efforts contribute to athletic improvement and community recognition of long-distance events in Kenya.

Conclusion (5 minutes):

- Summarize the key points learned, such as the techniques for long-distance racing and the importance of encouraging peers.

- Conduct a brief interactive activity, such as a "cheer for a runner" session, where students create encouragement phrases to support their peers in competitions.

- Preview the next session's topic, focusing on the history of long-distance running in Kenya and its champions.

Extended Activities:

- Encourage students to research a famous Kenyan long-distance runner and prepare a short presentation about their achievements and impact.

- Organize a mini-school marathon event where students can apply what they learned in a friendly competition, promoting teamwork and school spirit.

- Create a visual collage focusing on the achievements of Kenyan runners, integrating elements of art and athletics.

Teacher Self-Evaluation:

WEEK 9: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. State the meaning of Mosaic.

2. Identify the characteristics of mosaic in sample pictures.

3. Discuss the characteristics of mosaic in sample pictures.

4. Acknowledge the characteristics of mosaic in sample pictures.

Key Inquiry Question(s):

- What are the characteristics of Mosaic art?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Lesson Notes

- Samples of Mosaic art (print or digital)

- Digital resources (e.g., websites showcasing mosaic art)

Organisation of Learning:

Introduction (5 minutes):

- Begin by reviewing concepts from the previous lesson, ensuring students remember key points about different art forms.

- Introduce the topic of Mosaic by guiding students to read and discuss relevant content from their books, allowing them to highlight the meaning and significance of Mosaic art.

Lesson Development (30 minutes):

Step 1: Define Mosaic

- In pairs, have students explain the meaning of Mosaic. Encourage them to discuss what materials typically make up a mosaic and how these pieces come together to create a larger picture.

- Teacher walks around to facilitate discussions.

Step 2: Exploring Characteristics

- Provide various samples of Mosaic art (print or digital).

- Ask each group to identify and list the characteristics of the mosaics they see, focusing on color, shape, and material.

- Facilitate a discussion about the unique features of each sample.

Step 3: Analysis of Technique

- Guide students to analyze how mono media (the use of one type of material) and spacing of materials are used in the mosaics.

- Discuss how these techniques affect the overall aesthetic of the mosaic art and their importance in creating visual rhythm and movement.

Step 4: Group Discussion

- Each group presents their findings on the characteristics and techniques used in their assigned mosaic samples.

- Encourage a class discussion on why these characteristics are important to the art form, connecting back to the inquiry question.

Conclusion (5 minutes):

- Summarize the key points learned during the lesson, reinforcing the definitions and characteristics of Mosaic art.

- Conduct an interactive activity, such as a quick quiz or a "Mosaic Characteristic Match-Up" game, to reinforce the main topics discussed.

- Prepare students for the next session by providing a preview of what will be covered next (e.g., creating their own mosaic art).

Extended Activities:

1. Design Your Mosaic:

- Have students create a small mosaic using colored paper or tiles. They can design their mosaic based on a theme of their choice, allowing for creative expression while applying what they've learned.

2. Research Project:

- Assign a project where learners research a famous mosaic artist or a significant mosaic artwork. They can create a presentation or a poster outlining key characteristics and historical context.

3. Virtual Mosaic Tour:

- Organize a virtual tour of a museum or an online gallery showcasing mosaic art. Encourage students to take notes and reflect on what they see.

Teacher Self-Evaluation:

WEEK 9: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify locally available materials and tools to use in creating mosaic arts.

2. Collect and prepare materials and tools for creating a mosaic.

3.Appreciate the locally available materials and tools used in creating mosaic.

Key Inquiry Question(s):

- Which locally available materials and tools can one use to create mosaic?

Learning Resources:

- Environment Carton Boxes.

- Sample images of mosaic art.

- Safety gloves (for handling materials).

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on the importance of using local materials in art.

- Facilitate a discussion by asking students to share what they remember about mosaics. Use guiding questions to steer the conversation towards identifying materials.

Lesson Development (30 minutes):

Step 1: Identify Materials

- In pairs, students brainstorm and list down the materials they think could be used for creating a mosaic.

- Use classroom resources (like images or previous lesson notes) to aid in their identification efforts.

Step 2: Group Sharing

- Each pair shares their list with the class.

- Write down all unique materials mentioned by students on the board. Discuss why these materials are suitable for mosaics.

Step 3: Collecting Materials

- Assign groups to collect the identified materials and tools around the classroom or schoolyard. Remind them to think about safety when collecting items.

- Provide guidance on types of support and adhesive suitable for mosaics.

Step 4: Organizing Collected Materials

- Once materials are collected, guide students to sort and place them in safe boxes to prepare for the following lesson.

- Encourage groups to label their boxes for easy identification.

Conclusion (5 minutes):

- Summarize the key points about identifying and collecting mosaic materials discussed throughout the lesson.

- Conduct a brief interactive quiz where students can shout out answers about materials discussed.

- Briefly introduce what they will explore in the next session about actual mosaic creation techniques.

Extended Activities:

- Create a mini sketch of a mosaic design using the gathered materials as inspiration.

- Research famous mosaic artists and their techniques to present in the next class.

- Organize a field trip to a local art installation or community mosaic project to gain real-world insights.

Teacher Self-Evaluation:

WEEK 9: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1.Create a preliminary sketch based on the theme of athletics on a chosen support.

2.Enjoy creating sketches based on the theme of athletics on a chosen support.

Key Inquiry Question(s):

- Why is sketching important before creating mosaic arts?

Learning Resources:

- Various supports (e.g., cardboard, cartons, manila paper)

- Sketches of artistic works

- Pictures of athletics in action

Organisation of Learning:

Introduction (5 minutes):

- Begin the lesson by briefly reviewing key concepts from the previous lesson related to visual arts and preparing students for today's focus on athletics.

- Invite students to read and discuss selected images and information about athletics from the learning resources, ensuring they understand the theme.

Lesson Development (30 minutes):

Step 1: Choosing a Support

- Students will choose a suitable material (cardboard, cartons, or manila paper) that they will use for their sketches. Discuss the properties and advantages of each type of support related to artistic expression.

Step 2: Creating Preliminary Sketches

- Guided by the theme of athletics, students will sketch their ideas for a mosaic. Encourage them to think creatively about different athletic sports and movements that inspire them. Remind them to consider elements such as action, emotion, and balance in their sketches.

Step 3: Peer Review and Sharing

- Once students have completed their sketches, they will pair up to share their work. Each student will provide constructive feedback to their peer based on specific criteria (e.g., clarity of theme, use of space, creativity). Facilitate a discussion about their experiences.

Step 4: Refining Sketches

- After receiving feedback, students will have the opportunity to refine their sketches based on the comments and suggestions received. Emphasize the importance of reflection and improvement in the artistic process.

Conclusion (5 minutes):

- Summarize key points discussed during the lesson, highlighting the importance of sketching as a preliminary step before creating a mosaic artwork.

- Engage the class in a quick interactive activity, such as a "sketching ideas" round where students share one word to describe their chosen athletic theme.

- Provide a brief preview of the next lesson, where students will start transferring their sketches into mosaic art, and pose questions regarding different materials they might explore.

Extended Activities:

- Create a personal athletic collage by combining photos, magazine cut-outs, and their sketches that could serve as a background or inspiration for their mosaic work.

- Organize a class gallery walk where students can display their sketches and receive feedback from other classmates.

- Research famous athletes or athletic events and create a short report or presentation that connects to their sketches, further integrating art and sports culture.

Teacher Self-Evaluation:

WEEK 10: LESSON 1

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Create a mosaic pictorial composition inspired by an athletic event.

2. Acknowledge their own and others' efforts in creating the mosaic pictorial composition.

Key Inquiry Question(s):

- How can mosaic pictorial composition be used to improve the environment?

Learning Resources:

- Working space (tables, chairs)

- Sketches based on athletic themes (images of track events, team sports, etc.)

- Appropriate materials and tools for mosaic creation (colored paper pieces, scissors, glue, baseboards, etc.)

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson's key points on artistic expression and the basics of mosaic art.

- Discuss the connection between athletics and visual art, encouraging students to share any personal experiences or observations.

Lesson Development (30 minutes):

Step 1: Brainstorming

- In groups, students discuss various athletic events they are passionate about or inspired by.

- Each group selects an event and sketches a simple outline or concept for their mosaic piece.

Step 2: Material Selection

- Groups explore the available materials.

- Decide on color schemes and textures that reflect the chosen athletic event, emphasizing how these choices will enhance the overall composition.

Step 3: Mosaic Creation

- Start creating the mosaic by carefully placing pieces on their baseboards.

- Encourage students to focus on spacing and color contrast to ensure their design communicates the athletic theme effectively.

- Teachers will circulate, providing guidance and support.

Step 4: Group Reflection

- After completing their mosaics, groups present their artwork to the class.

- As they present, they should explain their concepts and the materials used, as well as reflect on what they learned about collaboration and artistic expression.

Conclusion (5 minutes):

- Summarize key points learned regarding the creation of mosaics and how it ties into athletic themes.

- Conduct a brief interactive activity, such as a “gallery walk” where students view each other’s work and leave positive feedback on sticky notes.

- Preview the next lesson, which will focus on the role of art in community spaces and how mosaics can be used to beautify public areas.

Extended Activities:

- Encourage students to create a personal mosaic project at home using recycled materials to reinforce eco-friendliness.

- Organize a class exhibition of their mosaics in the school or community, inviting feedback and discussions on art and athletics.

- Research famous mosaics and create a presentation on how they reflect cultural values, making connections to the importance of athletics in society.

Teacher Self-Evaluation:

WEEK 10: LESSON 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Athletics and Mosaic

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1.Present their created mosaic composition for assessment.

2. Acknowledge their own and others' efforts in the creation of mosaic pictorial compositions.

Key Inquiry Question(s):

- What are the characteristics of a good pictorial mosaic composition?

Learning Resources:

- Created pictorial mosaic compositions.
- Digital resources (videos, articles, images related to mosaics and athletics).

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson focused on the basics of mosaic art and its connection to athletics.
- Guide learners to read and discuss relevant sections from digital resources that emphasize the key concepts of visual composition and themes in mosaics.

Lesson Development (30 minutes):

Step 1: Group Formation

- Organize students into small groups or pairs for collaboration. Ensure each group has a mix of strengths to foster peer learning.

Step 2: Presentation Preparation

- In their groups, learners will prepare to present their athletic-themed mosaic compositions. Encourage them to discuss the inspiration behind their work, the materials used, and the techniques they employed.

Step 3: Group Presentations

- Have each group present their mosaic to the class. As they present, they should explain how their composition relates to athletics and highlight the key elements that contribute to its overall effectiveness.

Step 4: Peer Feedback

- After each presentation, facilitate a brief feedback session where peers can share what they enjoyed about each other's compositions and acknowledge specific efforts and techniques used. Remind students to be constructive and supportive in their feedback.

Conclusion (5 minutes):

- Summarize the key points discussed during the lesson, including the characteristics of good mosaic compositions.

- Conduct a quick interactive activity, such as a thumbs-up/thumbs-down poll, where students state whether they feel confident about their understanding of mosaic art after the lesson.

- Provide a preview of the next session, which might cover topics like the history of mosaic art or different techniques used in creating mosaic art.

Extended Activities:

- Create a Digital Mosaic: Encourage students to use graphic design software or apps to create a digital mosaic related to a sport of their choice.

- Research Project: Assign students to research different cultures' use of mosaics in art and architecture, presenting their findings in the next class.

- Collaborative Mosaic Wall: Organize an extended project where the class collaborates to create a larger mosaic on a shared theme related to athletics, which could be displayed at school.

Teacher Self-Evaluation:

WEEK 10: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Identify the types of musical variation.

2. Describe the types of musical variation.

3. Search for information on the different types of musical variations.

4.Acknowledge the use of types of musical variation in melody.

Key Inquiry Questions:

- How can melody be made interesting?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Lesson notes
- Digital resources (e.g., online articles or music databases)
- Clips illustrating various melodies and variations

Organisation of Learning:

Introduction (5 minutes):

- Briefly review the previous lesson on melody and its significance in music.
- Have students open their textbooks and discuss the key concepts of musical variations in pairs, focusing on how variations can enhance a melody.

Lesson Development (30 minutes):

Step 1: Understanding Variation and Melody

- In small groups, students will explain the meanings of "variation" and "melody."
- Each group will create a mind map linking different concepts and examples of melody and variation.

Step 2: Identifying Types of Variations

- Learners will explore the textbook and identify the types of musical variations (rhythmic, melodic, and dynamic).

- Each group will present one type of variation to the class, providing examples from familiar songs or pieces.

Step 3: Digital Research

- Students will use digital resources to further research examples of rhythmic, melodic, and dynamic variations, noting down interesting facts or examples they find appealing.

- Encourage students to take notes on how these variations are used in well-known melodies.

Step 4: Viewing and Discussing Clips

- Play brief clips illustrating different types of variations in melodies.

- After each clip, engage the class in a discussion about what variations they noticed and how they affected the overall piece.

Conclusion (5 minutes):

- Summarize key points from the lesson, highlighting the different types of musical variations discussed.

- Conduct a brief interactive activity where students can name popular songs and identify the variations present in them.

- Preview the upcoming session by introducing new concepts related to composition or performance of melodies.

Extended Activities:

- Activity 1: Have students create their own melodies using at least two different types of variations discussed in class. They can present these melodies in small groups.

- Activity 2: Assign students to research a specific song that uses significant variations. They must prepare a short presentation highlighting these variations and their impact on the song.

- Activity 3: Create a collaborative "Variation Playlist" where students can compile songs they believe showcase different variations effectively, which they can listen to and analyze together.

Teacher Self-Evaluation:

WEEK 10: LESSON 4

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Describe the use of variation in composing a melody.

2. Sing familiar tunes incorporating variations.

3.Acknowledge the significance of variation in the composition of Melody.

Key Inquiry Question(s):

- What is the importance of variation in music?

Learning Resources:

- Creative Arts and Sports Learner's Textbook
- Various familiar tunes
- Digital resources (e.g., music apps, websites)
- Lesson notes

Organisation of Learning:

Introduction (5 minutes):

- Begin with a brief review of the previous lesson on melody basics.
- Ask students to share their understanding of melody and lead into a discussion about how melody can change through variation.

Lesson Development (30 minutes):

Step 1: Introduction to Variation in Music

- Explain the concept of variation in music: what it is, how it works, and why it’s used.
- Use examples from well-known songs to illustrate how melodies can change. Engage learners by asking questions about these examples.

Step 2: Group Discussion

- Divide learners into small groups or pairs.
- Assign each group to discuss the importance of variation in music composition and share any examples they can think of.
- Encourage students to consider how variation keeps music interesting.

Step 3: Singing Familiar Tunes

- Invite learners to sing familiar tunes as a class.

- As they sing, discuss how the melody can vary (e.g., improvisation, changing pitch, or altering rhythm).

- Ask students to experiment with their own variations using familiar melodies.

Step 4: Sharing and Reflection

- Have each group share their thoughts on the importance of variation in music and provide an example of a song where they noted variation.

- Discuss how variations affected their perception of the song and overall enjoyment.

Conclusion (5 minutes):

- Summarize the key points discussed in the lesson: what variation is, why it's important, and how it can change familiar melodies.

- Conduct a brief quiz or interactive activity where students identify variations in different melodies played.

- Preview the next lesson on improvisation and how it connects to variations in melody.

Extended Activities:

- Composition Assignment: Have students create their own short melody and then develop three variations of it. They can perform for the class.

- Listening Journal: Encourage students to listen to a song of their choice and write about the variations they notice throughout the piece.

- Research Project: Assign students to research different genres of music and how variation is utilized within them, leading to a presentation in future class sessions.

Teacher Self-Evaluation:

WEEK 10: LESSON 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Describe the structure and characteristics of melodies in the key of F major and 4/4 time.

2. Use digital devices to search for melodies in F major and 4/4 time.

3.Acknowledge the structure and features of melodies in the F major and 4/4 time.

Key Inquiry Question(s):

- What is the structure and features of the melody in F major?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources (music apps, websites)

- Lesson notes

Organisation of Learning:

Introduction (5 minutes):

- Review the previous lesson on melody basics.

- Guide learners to read and discuss relevant content from their textbooks about the key of F major and time signatures, emphasizing key concepts like scale and time signature.

Lesson Development (30 minutes):

Step 1: Searching for Melodies

- Students will pair up and use digital devices to find examples of melodies in F major and 4/4 time.

- Each pair should compile a list of at least three melodies, noting their titles and composers.

Step 2: Discussion of Structure

- In their pairs or small groups, students will analyze the melodies they found.

- They will discuss the common structure and characteristics of the melodies, focusing on phrases, motifs, and harmonic support in the F major key.

Step 3: Performing the Scale

- Guide the class in a group activity where they will perform the F major scale together, emphasizing correct pitch and timing.

- Introduce the tonic arpeggio in F major, allowing them to practice the arpeggio as a class.

Step 4: Presenting Findings

- Each pair presents one melody they researched, highlighting its structure and features.

- Encourage short performances if possible, or mimic the rhythm to engage everyone.

Conclusion (5 minutes):

- Summarize key points discussed about melodies in F major, referring to examples found by students.

- Conduct an interactive activity, such as a quick game of “Name that Tune” using the melodies studied.

- Preview the next session focusing on harmony and its relation to melody.

Extended Activities:

- Compose a short piece of music in F major using the characteristics learned in class. Include both melody and a simple accompaniment.

- Create a visual representation (like a poster) illustrating the structure of a chosen melody, noting the different sections and characteristics.

Teacher Self-Evaluation:

WEEK 11: LESSON 1 - 2

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1. Compose a four-bar melody in F major and 4/4 time.

2. Value the use of melody in Creative Arts and Sports.

Key Inquiry Question:

- How do you create a four-bar melody in F major?

Learning Resources:

- Creative Arts and Sports Learner's Textbook

- Digital resources (e.g., music composition software, online tutorials)

Organisation of Learning:

Introduction (5 minutes):

- Begin the lesson with a brief review of the previous session, focusing on key musical terms and rhythm.

- Guide students to read and discuss relevant content from the learner's textbook about melody, its characteristics, and functions in music and sports. Highlight the importance of melody in enhancing performances and conveying emotions.

Lesson Development (30 minutes):

Step 1: Understanding F Major and 4/4 Time

- Review the F major scale together as a class, explaining the notes (F, G, A, Bb, C, D, E) and how they are represented on a staff.

- Introduce 4/4 time signature, illustrating how beats are counted (1-2-3-4) and how strong and weak beats work.

Step 2: Group Collaboration and Melody Creation

- Divide students into pairs or small groups. Instruct each group to brainstorm ideas for their four-bar melody in F major. Encourage them to think about how they can use varied phrases (a mix of short and long notes).

- Remind them to keep the rhythm consistent with 4/4 time as they sketch out their melody using notes from the F major scale.

Step 3: Adding Phrase Marks and Dynamics

- Provide groups with guidelines on adding phrase markings to their melodies. Explain the importance of dynamics in music (loud vs. soft) and how it adds expression.

- Instruct students to mark one phrase of their melody as loud (forte) and the other as soft (piano) to give their composition more character.

Step 4: Practice Sharing and Feedback

- Allow each group to present their composed melody to the class.

- Encourage constructive feedback from classmates, focusing on aspects like creativity, use of dynamics, and adherence to the F major scale and 4/4 time.

Conclusion (5 minutes):

- Summarize the concepts learned during the lesson, including the process of creating a melody and the importance of dynamics and phrasing.

- Conduct a brief interactive activity, such as clapping out the rhythm of one of the presented melodies, reinforcing understanding of rhythm in melody composition.

- Preview the next session, which will delve into the relationship between melody and sports performance, highlighting upcoming questions to ponder.

Extended Activities:

- Create a choreographed dance or a sports routine that incorporates their composed melodies to explore the integration of music and movement.

- Invite students to use digital music tools to record and produce their melodies, allowing them to experiment with different instruments and styles.

- Research a famous piece of music in F major and analyze how melody is used effectively within that piece.

Teacher Self-Evaluation:

WEEK 11: LESSON 3

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, the learner should be able to:

1.Perform melodies in F major and 4/4 time.

2. Value the use of melody in Creative Arts and Sports.

Key Inquiry Question:

- How can a melody be made interesting?

Learning Resources:

- Digital resources

- Melodies (sheet music/audio samples)

Organisation of Learning:

Introduction (5 minutes):

- Begin with a quick review of the previous lesson's key points, focusing on the musical concepts introduced.

- Engage learners in a discussion about melodies by asking them to share any melodies they find interesting and why.

- Introduce the day’s focus on performing and valuing melodies, using the digital resources for reference.

Lesson Development (30 minutes):

Step 1: Sight Reading Melodies

- Distribute printed melodies in F major and 4/4 time.

- In pairs, learners take turns sight-reading the melodies aloud. Emphasize the importance of rhythm and pitch during this exercise.

Step 2: Collaborative Performance

- In groups of four, students select one melody to rehearse and prepare a performance. Encourage them to discuss ways to add dynamics or expression to their interpretation to make the melody more engaging.

Step 3: Listening and Feedback

- Each group performs their chosen melody for the class.

- After each performance, encourage the class to provide constructive feedback on aspects like clarity, expressiveness, and overall melody interest.

Step 4: Reflection and Discussion

- Facilitate a group discussion on what elements made certain performances more interesting than others.

- Discuss how melody is important in various forms of creative expression, including sports.

Conclusion (5 minutes):

- Summarize the key points discussed: the components of a melody, the importance of performance, and how creativity can enhance a simple melody.

- Conduct a brief activity, such as an interactive quiz or quick group game that reviews the day's concepts.

- Preview the next lesson by hinting at a new topic on rhythm and tempo, encouraging learners to think about how rhythm interacts with melody.

Extended Activities:

- Encourage learners to compose their own short melody in F major. They can use digital music software or write it out by hand.

- Assign a project where each student researches a famous melody and presents on its history and significance in Creative Arts or Sports.

Teacher Self-Evaluation:

WEEK 11: LESSON 4 - 5

SCHOOL	LEVEL	LEARNING AREA	DATE	TIME	ROLL
	GRADE 9	CREATIVE ARTS			

Strand: Creating and Performing

Sub Strand: Melody

Specific Learning Outcomes:

- By the end of the lesson, learners should be able to:

1. Notate four-bar melodies in 4/4 time.

2. Enjoy notating four-bar melodies in 4/4 time.

Key Inquiry Question:

- Why is it important to notate melodies?

Learning Resources:

- Melodies (digital resources)

- Creative Arts and Sports Learner's Textbook

- Exercise books

Organisation of Learning:

Introduction (5 minutes):

- Review Previous Lesson: Start with a brief recap of last lesson's key concepts related to melody and notation.

- Discussion: Guide learners to read and discuss the relevant content from the learning resources to reinforce their understanding of melody notation.

Lesson Development (30 minutes):

Step 1: Understanding Note Values

- Introduce the note values (dotted minim, dotted crotchet, quaver) with examples.

- Facilitate a group discussion on how these notes fit into the structure of a four-bar melody in 4/4 time.

Step 2: Illustrating Note Values

- Students illustrate the note values (dotted minim, dotted crotchet, quaver) on their exercise books.

- Encourage students to draw these notes in groups and present their illustrations to reinforce collective learning.

Step 3: Writing a Variation in F Major

- In pairs, have students compose a 2-bar answering phrase in F major that serves as a variation of a provided melody.

- Ensure they maintain 4/4 time signature while applying the note values discussed.

Step 4: Notating Four-Bar Melodies

- Guide students in notating their own four-bar melodies in 4/4 time.

- Afterward, provide time for them to share their notated melodies with their peers for constructive feedback.

Conclusion (5 minutes):

- Summarize Key Points: Review the steps taken in today's lesson and the importance of notating melodies.

- Interactive Activity: Conduct a quick quiz or game (like a melody guessing game) to reinforce the main topics.

- Prepare for Next Session: Briefly discuss what students can expect in the next lesson, such as exploring harmonies that complement their melodies.

Extended Activities:

- Composition Challenge: Create a four-bar melody using only dotted notes and quavers. Share this with a friend and provide feedback.

- Digital Notation Software: Use a music notation app or software to notate a short melody and compare it with a peer's created melody.

- Melody Memory Game: Students create pairs of notated melodies and quiz each other on identifying the correct melodies by ear.

Teacher Self-Evaluation:
